A leadership network of investors reducing the financial risks of chemical pollution while leveraging the economic value of green chemistry

A project of Clean Production Action

By 2030, the renewable energy economy and its supply chains in the United States will reduce their chemical footprint by 50%; thereby making significant progress towards the United Nations' Sustainable Development Goal (SDG) #3.9—Good Health and Well-Being, SDG #6.4—Clean Water and Sanitation, and SDG #12.1—Sustainable Consumption and Production.
