

method products, inc. was founded in 2000 by adam lowry and eric ryan, two former roommates turned entrepreneurs. adam, an environmental scientist, and eric, an advertising guru, combined their knowledge of style and substance to create **method** – stylish, non-toxic cleaning products that are safe for people and the environment. headquartered in San Francisco, **method** is a leading innovator of green home and personal care products. **method** can be found in over 25,000 retail locations throughout the United States, Canada, the UK and Australia.

method believes in inspiring a happy, healthy home and we practice what we preach. we make non-toxic, biodegradable products and we never test on animals. we use natural ingredients, that won't harm people or the planet, which we happily disclose. we use recycled materials in our packaging and strive to ensure our products are recyclable. the vast majority of our products are manufactured in the United States. and we go beyond green products to how we make those products, utilizing a biodiesel semi-trailer, solar powered forklifts, and other supply chain innovations that make us extremely carbon efficient. what we can't eliminate, we offset with methane capture. over 50 of our products are recognized by the EPA design for the environment and we are the first line of cradle-to-cradle certified cleaning products. we believe we can make a difference in the world without compromising quality (and have fun doing it!).

we are experts in...

WE SUPPORT TSCA REFORM . . .

Method rigorously screens the chemicals we use in our products and will not use ingredients that have negative health or environmental implications. We practice the precautionary principle. We believe in transparency and disclose all of the ingredients in our products to our consumers, yet as downstream users we have often encountered a lack of transparency from our suppliers. We believe all downstream purchasers of chemicals are entitled to transparency and we urge Congress to embrace these principles. We believe in TSCA reform.

TSCA SHOULD INCLUDE . . .

Mandatory Ingredient Labeling on All Products
"Producer Right To Know": Mandatory Disclosure of Chemical Ingredients to Downstream Users
Incentives for Businesses Who Embrace Green Chemistry

KEY STATISTICS. . .
